

Power Function (Maureen and Richard Hall)

A D A E
If you got a problem, I got a plan, I've got a solution, for your biggest demand

G D B
I see all the angles; I know where it will all land

D E A
But I really must warn you, my best intentions, can get out of hand

(chorus)

D A D E
I am a power function, more than multiplied, Always in motion, always running behind

D A D A E A
I take it to the next level, again and again, I am exponential by a power of ten

You got a problem, it's easy to see, Oh but don't you worry, just leave it to me
It's a little elaborate, an almost perfect plan
But I really must warn you, my best intentions, can get out of hand

(chorus)

A little enthusiastic, what can I say, I get a little excited, and that can get in the way
but once I catch the spirit, it's hard to stop
I'm already in flight, it's gonna be alright, I'm way over the top.

(chorus)
