

Sean Christopher- LONG BIO-"Mystique CD" 2016

The release of Sean Christopher's long awaited Music Album is a promise fulfilled. A promise he made to himself at the beginning of 2015. The album was actually created 20 years ago but the technology was not up to Sean's standards.

Now with better technology and equipment he has created his life's dream.

As someone who has never gone to music school, Sean found his passion through dedicated hard work as he taught himself how to be a composer from the early age of 5. He found his inspiration through his blood. As Sean has playfully put it, his love for the violin and viola, "his grandfather's fault". That would be Dennis McGee who was a well-known legend in Louisiana Cajun music. Sean's family tree also includes his father Gerry McGee, who is a successful guitar player that accompanied both Eric Clapton and the iconic Elvis Presley.

Sean's mother Anne McGee, is a Children's author as well as a singer and songwriter. It was from her that Sean gained his understanding of artistic writing.

The "Mystique" CD offers a mixture of Viola, Cello, Piano, acoustic flutes and a vast accompaniment of orchestral instruments. There are 12 songs in total.

Sean is the composer, producer and editor of this album. This compilation renders beautiful melodic harmonies which gives the ability to make an emotional connection with the listener.

*Music Supervisor Barbara Jordan who supervises Music for Film and Television projects, is quoted as saying: *"Sean Christopher is a powerful voice in the new generation of music. His shimmering Timbres are majestic and soothing. When I listen to his music, I am transported to a peaceful place beyond space and time."*

The other interest he has in this project, is his art work and photography. As part of the marketing effort Sean has created a picturesque book. This book shows the artwork created for each song and includes a deeply meaningful description of the message each song is trying to convey.

As the chief publicist and marketer for this album, Sean, plans to reach out to venues such as dance studios, Olympic Figure skaters as well as Cirque du Soleil .

The album is looking at a release date of around the middle of 2016 and will be available on iTunes, CD Baby among others. More info will be available on his website at www.ImSean.org.
