

## Up Against the Grain

Flat tire oh no  
Rainforest is burning down  
rubber soles and lighted screens  
the whole damn world is history  
all thats left is you and me

Long way from the right way is where I stand  
its a long way from home  
got the north star to find my way  
but all roads lead to you  
and I know just what to do

So come with me cuz the lonely road  
is the only one ive traveled  
all it takes is all you know  
when all you know gets shattered

Bombs blast on broken ground  
disconnected from all we know  
ready made is ready to go  
And so am I  
so come on its time to fly

So come with me its a long way home  
and all I want is you  
All it takes is lying away  
on the road well find our fate

So unbolt me lets go  
like a spider trapped in the snow  
its hunger keeps me waiting  
its bright eyed I know  
up against the grain, im up against the world  
im up against the grain, im up against the world

ill sit here writing  
in the comfort of my home  
insulation feels so nice  
ill just think about you  
cause I dont know what else to do
