

# LOVEWHIP STAGE PLOT (4-piece)

## Input list:

- 1 vocal mic front line (center) - I have my own Telefunken M-80
- DI for electronic drums
- 1 mic for guitar amp (Quilter MicroPro 8" speaker)
- 1 mic for harmonica amp (Fender Pro Jr.)
- Bass amp (has built in DI)
- Sequencer - we have a DI, this goes into PA not an amp
- 1 vocal mic for the drummer (boom mic stand)
- 4 piece drum set

## Main/house mix:

We like a little slap-back delay on the lead vocals, and reverb on the bass vocals (which should be quieter). Sequencer should be loud, like a lead instrument, harp and lead guitar just under the vocals.

## Monitor mix:

Everyone wants vocals with lead loudest especially in front/center monitor (no fx in monitor mixes), also harp, guitar, sequences, e-drums; kick drum and bass if needed.
