

## Online Rock

i need you, baby, like never before  
my connection with you is dropping us cold  
and i saw it comin', you still don't

i want you so much baby  
i know i'll have to survive those games we always play  
with online rock  
with online rock

we have our distance and we stay polite  
but i see you turn on with some other guy  
he don't have what i do, though he'll try

i want you so much baby  
i know i'll have to survive those games we always play  
with online rock  
with online rock

i'm only the best that you can know  
i'm all of the feelin'  
i'm only the best that you can know  
i'm all of the time

with online rock
