

This Little Thing We Have

The reason that I left
So you could get some rest

You know I don't belong here
You know I don't belong

I could only reach you if I knew how to try

You're in the daytime girl
A model in my world

You know I don't belong here
You know I don't belong

I could only reach you if I knew how to try

This little thing we have
This little thing we have

You try to take away
But I've been here all day

You know we don't belong here
You know we don't belong

I could only reach you if I knew how to try

This little thing we have
This little thing we have
This little thing we have (ain't going away)
This little thing we have (ain't going away)
This little thing we have (ain't going away)
This little thing we have
