

THE Haberdashers

The Haberdashers bring to the stage a whimsical blend of siren-esque harmonies and swashbuckling pirate roars guaranteed to inspire even the most apathetic listener to raise the black flag and toast a tankard of grog. The ragtag band of five are far more than just well-accessorized seamen (and a seamstress), they are an explosion of high energy folk/Americana goodness featuring show stopping vocals, plucky banjo, the occasional mandolin lick, and a whole lot of damn-catchy songwriting.

Lead songwriter Jaron Kucera and guitarist Erik Buerkle met and began writing music together over ten years ago in their rural Kentucky hometown. The two linked up with bassist Andy Mirsberger, banjoist Patrick Hornbeck and mandolinist Emma Kate in 2014 after meeting in an Austin, TX hat shop, where they were all currently employed. Yes, every band member is a real life, bona fide haberdasher. Not only can they serenade your ear holes with aural pleasure, but they can custom shape and fit your hat after the show.

In the short time The 'Dashers have been together, they've established themselves as a band to watch, having played hundreds of exceptionally well-received shows in and around Texas. Their soon to be released self-titled EP is sure to make a splash. Beware ye who listen, you may find yourself yo-ho-hoing all the way from Austin, Texas to Davy Jones' locker!

"[The Haberdashers'] CD delivers the same enthusiasm and lighthearted humor as a live performance. This CD is like having the whole band right there with you."

—Chanel Ingram, music and pirate enthusiast
