

[SOCH] -- 12/11/15 - **UPDATE from Bill, our foreman:** *"We're definitely making the most out of this mild weather. The fascia and capping will be done today along with the cedar shake on the inside of the upper wall. Next week we will start cedar shake on the exterior walls, the roof deck for the HVAC equipment, and the north walk so we can frame the shed and install the exterior stair case. In laymen's terms, we're kicking ass!!!"*
