

### **Brian Queenin**

Advisory board member

With decades of successful management-consulting experience with global leadership credentials, Brian brings a diverse set of capabilities to **epiCentrix**. As a senior consulting executive in the arena of Enterprise Performance Management (EPM), Business Intelligence/Analytics, Strategy, and Big Data he has helped Fortune 100 clients improve their strategy and information management capabilities.

As an entrepreneur he co-founded a boutique consulting firm that was later sold to a national consulting organization. He additionally serves on the advisory board of several organizations in business and philanthropy. Some of his accomplishments include:

- Led the development of the largest automotive database in the world
- Managed a \$505 million dollar global consulting practice
- Sold and managed over \$375 million in project based work in consulting career
- Spearheaded the technical aspects of a merger for two major home improvement chains
- Managed the creative development for digital customer identity for a worldwide sports apparel company
- Built the largest consumer products database at its time for a global beauty and cosmetics company
- Wrote the strategic technical plan for an international oil industry company
- Executed the design and development of market ready software that contributed \$30 million a year to the bottom line
- Held senior executive, Partner, and practice leader positions at Ernst & Young, Accenture, and IBM
- Requested speaker and published author

Throughout his career, Brian has brought a passion for hard work, creative excellence, and teambuilding to every aspect of his work. Delivery excellence, customer satisfaction, and on-time delivery have been a recurring theme in his career.

Brian holds an MBA, awarded with distinction, from the Lubin School of Business at Pace University in New York.
