

I have been co-publisher of Educational Dealer Magazine for over 25 years. During that time period, I've had several opportunities to listen to Bobby Susser's songs for children. He never disappoints you, and with Green Light, he continues to rise above your greatest expectations. He has the ability to write the most catchy, melodic lines that children can easily sing along with, and lyrics that teach in a most friendly and fun-like manner, also easy to sing. With a number of instruments like cow bells, shakers, several guitars, bass, pianos, a section of horns and violins, and several percussive instruments, Susser covers a variety of subjects and a variety of musical styles that will keep children, and adults stimulated throughout this entire collection. With these songs about Living in This World, Thank You Mister Sun, We're Gonna Laugh All Day, A Brand New Day, and more, the musical styles from Reggae, Shuffle, Rock n' Roll, Exercise, and a Rest Song will surely be placed at the top of your heap of favorite music for all age children.
