

Thank you so much for being on Wildfire, we truly appreciate what you do for kingdom and are blessed to be sharing your story.

Here are a few pre-show production tips:

- About 15-20 minutes prior to show time (7:30 PM CST) I will send you via e-mail, Facebook private message, or text a direct link to the show. This is the “backstage” private area of the show on [be.live/](https://be.live/) – you will be directed on your mobile phone to the steps. Simply download the belive.tv app to your phone, hit “OK” a few times, and then join the show.
- Please turn your phone horizontal, as this gives us the most onscreen view options.
- If you have a laptop with a camera, this option has proven to be the most reliable and stable for online guests with the be.live.tv software. To log in using a laptop, you must have the latest version of Google Chrome downloaded, and you must use Chrome as your browser for the show. Simply use the provided link to access the “backstage” area.
- Please use a **second** device (laptop, PC, tablet, mobile phone) for sharing the post to your own Facebook feed. Sharing the post to your own feed or base greatly increases the amount of live viewers and traffic during the show. The second device also allows you to see on screen comments from viewers – this can’t be done on the phone you are using for the live broadcast.

Thank you so much! I’m excited about our upcoming kingdom conversation and sharing your story.

Grace and Peace,

Christine DeCurtis
