

In recent years, the hardwood flooring industry has introduced a wide variety of new products to choose from. Options of unfinished and prefinished flooring are now available in all wood types from the traditional pine or oak woods, to the choices of birch, cherry, mahogany, along with many others, to include the newer exotic options of bamboo and cork.

Would you like to design a layout using a couple different wood types? Call for your on site appointment and let us help you customize a layout and wood type based on your household or business needs.
