

B R E A T H E

I'm just a face in the crowd

Never one to be too loud

They always stood so tall

Always good to make me feel small

I'm scared of all the little things

Can't even step outside my skin

I've been stopped too many times

Am I me or just a lie

We're all just broken things

With fragile minds we're full of sins

Behind the masks we wear

And sometimes when I want to speak

The words I feel escaping me

I gasp for air—for something

But I can't even breathe

No I can't even breathe

I can't breathe

I always get pushed down

Can't ever stand my ground

With stupid empty words

They try to make me feel worse

You gotta fit the mold but be original

Want to speak our mind but we always

Run away and hide

And sometimes when I want to speak

The words I feel escaping me

I gasp for air—for something please

But I can't even breathe
No, I can't even breathe
I can't breathe
We're going insane, all the same
We want to be saved
No one believes cause they can't see inside
They don't even try
And sometimes when I want to speak
The words I feel escaping me
I gasp for air for something
And sometimes when I want to speak
The words I feel escaping me
But I can't even breathe
No I can't even breathe
No I can't breathe
