

# HOW TO LISTEN TO MUSIC

(On a Computer)

## 1. Open Google Earth.

You are here.

This is it.

This is where it all happens, where your whole experience takes place.

You're going to get familiar with Google Earth.

## 2. Open Spotify.

This is a good start, in terms of getting to know the sounds of all the life of those who live on the thing you are looking at in Google Earth.

God willing, there will be more comprehensive, inclusive Streaming Platforms in the future.

For now, you'll have to make do with the billions of songs that are on it to start.

## 3. Open Ecosia.

This is a lovely way to plant trees on the thing that you are exploring in Google Earth.

Heck, you could even find the places where you are planting trees!

Simply incredible.

Create a moment of Gratitude for Ecosia.

Thank you, Ecosia!

(Option to foster gratitude for everything)

So.

You have your place, Google Earth, your library of sound, Spotify, and your entirety of knowledge, via The Internet.

**That's it!**

*The only remaining thing you need  
is a deep curiosity for the human condition  
a yearning to hear and understand all voices  
for to hold each one  
with unconditional love  
giving all you can give*

And then you will stop to listen
