

## Sugar in Space

© Jim Ocean

Sugar in Space  
Bread crumbs through the darkness  
Water everywhere  
A place for life anywhere...

There's rain in a cloud  
And fish in the sea  
There's worms in the ground  
There's love in you and me

In the vacuum of space  
Sweetness abounds  
Making a place  
Where life can evolve

And something for love to keep  
surviving  
Something for love  
To keep finding a way

Nothing's a word  
For something unseen  
You know that the void  
Has tricks up it's sleeves

In the vacuum of space  
Sweetness dissolves  
Making a place where  
Life can evolve

Something for love  
To keep revealing  
Something for love  
To keep believing in (like)

Sugar in space  
Breadcrumbs through the darkness  
Water everywhere  
A place for life anywhere

Sugar in space  
Something left supplies  
Water everywhere  
A place for love anywhere

Some folks see the stars  
As ancient points of light  
Some folks see the stars  
As atoms that ignite  
Some folks see the stars  
As proof that there is faith

And some folks say the stars seem like  
Sugar in space...
