

Said the Dark to the Light

by Jim Ocean ©2011

I will hold, I will keep you
I have made you a home
Galaxies to enfold you
You won't be alone

I hold us together
I will keep you in sight
Shelter you from the weather
Said the Dark to the Light

I was there in the beginning
I was there at the birth
When the stars started singing
I heard your Sun and your Earth

You're the snow on my mountain
And you shine so bright
Like a sail on a black sea
Said the Dark to the Light

Open your mind to me
And you'll see I've always been there
I know that you can't see me
But I'm everywhere

I've been waiting to meet you
Like a long lost friend
I've been wanting to feel you
Coming close in the end

'Cause we live in a story
With so much to write
Someday soon you will know me
Said the Dark to the Light
Said the Dark to the Light
Said the Dark to the Light...
