# Story

“TBD”, The Big Dream, is a collection of eight songs about finding inner beauty in people, of helping others make positive changes in their life, and of seeking one’s dream despite challenges, addictions and distractions. These are songs about being positive and finding the bright side in life. The title track is a moving and personal account of finally chasing my own dream of recording my own music to share with the world. I hope these songs brighten your day, inspire you to be your best self and even cause you to sing along. Namaste.
