

Artist: **Plastic Yellow Band**

BIO: Gerry Jennings is the songwriter, lead singer and producer for Plastic Yellow Band. The band is modeled after Plastic Ono Band created by John Lennon, in the sense that it is composed of a songwriter/musician (in this case Gerry) and the various studio musicians who join him at any given time to produce his original music.

Gerry has a long history as a singer-songwriter, having performed solo in such notable venues as the Bluebird Café in Nashville. In 2011, Gerry sold the finance business that he had founded, and formed ISI Studios to focus on music production. Plastic Yellow Band's music reflects the wide range of his talent both

for production and composition. Some songs are in the singer-songwriter style, produced simply with an acoustic guitar and vocals. Others exhibit the progressive rock influence of Porcupine Tree and Pink Floyd, with an emphasis on varied tempos and multi-track productions. And of course still others are influenced by the intellectual and emotional depth of Lennon's music.

**Band Members:** The current make-up of the group includes Gerry Jennings (vocals, piano, guitar), Joe Hurt (bass), and Jody McCullough (drums), Dana Rideout (vocals) and Paul Leslie (guitar).

**Location:** Aiken, SC, USA

**Musical Style:** "New Classic Rock" .... Influences by rock artists of the 60's and 70's merged with modern progressive rock.

**Sounds like:** John Lennon, Pink Floyd, Porcupine Tree, ColdPlay. PYB plays covers of Elton John, Jackson Browne, Eric Clapton, Lennon-McCartney, James Taylor and more along with PYB's original "new classic rock".

**Tours:** Currently PYB is focused on music production at ISI Studios.

2014 Release: Play Along with PYB

A companion CD is available at CDBaby and iTunes. Plastic Yellow Band has re-mixed some of the "new classic rock" songs from their debut album "Breathe Air" leaving out specific instruments in each mix. Beginner and intermediate level musicians can learn to play the part which has been deleted from the original mix.....U Play Guitar, U Play Bass, U Play Drums.....in other words they can "Play Along with PYB". The "Play Along with PYB" video series at [www.isimusic.com](http://www.isimusic.com) provides instruction and tips from the band members. Musicians at any experience level can be creative and record their own renditions of the missing instrument to the re-mixes from PYB.
