

# Sunsphere

(by Molly Ledford)

I'm going to the Eifile Tower of Knoxville  
Going to the Sunsphere  
Elevator inside, I'll take a ride  
Up above the town town town

Going to the Space Needle of Knoxville  
going to the Sunsphere  
And when you behold the shiny and gold  
Can you see me looking down down down

*In 1982, the world came to visit you  
Now decades later this party favor, decorates the view*

I'm going to the crystal palace of knoxville  
Going to the Sunsphere  
It's a funny thing about human beings  
we like to build up from the ground ground ground

Looking into the past, see how we thought about the future  
I'm seeing a feeling  
I wonder if it's still around round round

*In 1982, the world came to visit you  
Now decades later this party favor, decorates the view*

Energy turns the world - that's what they said  
Energy turns the world - that was the line  
Planets circle round the sun  
And the countries all came to Knoxville

*In 1982, the Sunsphere was brand new  
And I was 14-years old, living right down the road  
When the world came here, I remember it so clear*

*Now we've still got the sun*

*The Sunsphere*

*The Sunsphere,                      the Sunsphere*
