- 49 re: declining abortion "For China as a whole the abortion ratio was 48 per 100 births in 1987. In the state of New York it was 75 in 1985, and 43 for the U.S.A." Based on information from Negative Population Growth. The figures were developed from the Statistical Abstract of the United States, 1988: The number of abortions per 100 live births has declined from 59 in 1985 to 48 in 1987, not far from the U.S. rate of 42. Outlook, 1989:2
