

Something 'Bout This Mountain

Jeff Berkley

Something 'bout this mountain feeds my soul
Something 'bout 10 thousand feet makes me whole
I've been circling the desert and it takes its toll
But something 'bout this mountain feeds my soul

Something 'bout this ocean makes me high
Something bout the salt and breeze and the tugging of the tide
I've been feeling lost and low, and my energy's run dry
Something 'bout this ocean makes me high

Something 'bout this city brings me to my knees
Something 'bout the one way streets and transplanted trees
Ah honey let's get outta town, I'm begging darling please
Something 'bout this city brings me to my knees

Something 'bout this moment makes me smile
Something 'bout this time together, though it's just a while
But I will carry all your hearts with me down each and every mile
Something 'bout this moment makes me smile
