# COVID-19 STINKS.

It has and will continue to effect the way we gather to celebrate group functions, weddings and life events.

Sharing these special moments with your guests, clients, colleagues and loved ones is an invaluable part of these experiences, and we are committed to doing all we can to assist you in allowing for this.

To that end, we have teamed up with our friends at OnCore A/V to offer professional streaming packages.

These packages vary in size and scope - but share the fundamental purpose of allowing the attendance of customers, clients, family and friends virtually - from anywhere in the world.

All of the package options are 100% customizable, open to negotiation and can be streamed to the service of your choice.

If you are an individual or organization grappling with the difficult decisions related to your event, we would love to chat!

## About OnCore A/V:

OnCore A/V is a Michigan-based company with over 15 years experience in live streaming. Most notably, they provide these services to the West Michigan Whitecaps and Traverse City Pitspitters - so rest assured, they know their stuff!
