

# Paris to the Moon

© 2019 Bryan Fogelman (SOCAN); Henrik Jacobsson (STIM)

Inside the darkest night  
I shine a shattered light  
That's when I see you (that's when I see you)  
Above the avenue  
Your eyes a faded blue  
That's when I see you (that's when I see you)

Standing there on our front step  
Standing there the day you left  
And you said "I love you"  
From Paris to the moon (I love you)  
From Paris to the moon (I love you)  
All that we've been through  
I love you.....from Paris to the moon

The fragments that I save  
They sail across the wave  
And still I see you (still I see you)  
Your journey starts again  
But mine will never end  
And still I see you (still I see you)

Standing there on our front step  
Standing there the day you left  
And you said "I love you"  
From Paris to the moon (I love you)  
From Paris to the moon (I love you)  
All that we've been through  
I love you.....from Paris to the moon

Some words I should have said  
They burn inside my head  
Every time I see you`

Standing there on our front step  
Standing there the day you left  
I should've said I should've said  
"I love you"  
From Paris to the moon I love you  
From Paris to the moon I love you  
All that we've been through I love you.....  
From Paris to the moon  
From Paris to the moon (spoken)
