

You're Never Too Far Away

You're a million miles away... from where you started out
You'd like to come back home, but you're having your doubts
'Cause you're not sure He even heard you
All those times you tried to pray
Now you're wondering if He'll take you in, or turn you away

CHORUS

You're never too far away... that He can't hear you when you pray
He knows all your fears, sees all your tears, feels all your pain
Just turn around and you will find
He's standing beside you with His arms open wide
He knows where you are... never too far away

Ooooooh, you've wandered off before, but you've never gone this far
There've been times you just ignored that voice inside your heart
Let me tell you a secret about the Father's love
His grace is more than sufficient, for anything you've ever done

CHORUS

Just turn around and you will find
He's standing beside you with His arms open wide
He knows where you are, you're never too far away
He knows where you are, you're never too far away
