Please read this entire rider carefully. This rider is 4 pages. If you have not received all the pages, have difficulty reading anything or have any questions, please do not hesitate to contact us.

We've tried to make this technical rider simple and responsive as possible. Changes to this rider are not allowed without written approval of management.

LOAD IN / LOAD OUT:

The artist needs a minimum of 2 sober and physical strong people for help loading and unloading of equipment. If loading is difficult, for example, long stairs, long carry etc. please add 2 extra. Local crew must be available from arrival to backline is set up, and from dismantling start until everything is packed in the tour vehicles. These individuals should be experienced and have routine in such kind of work.

RIGGING AND SOUNDCHECK:

It will take up to 2 hours to set up, check and sound check artist equipment. This is based on the precondition that the local equipment is **set up, tested and found in order and ready for use** artist's load in time.

Artist or artist's crew will not take responsibility for delays due to technical failure of equipment supplied by the organizer.

SAFETY:

It is of vital importance that audience, artist and crew feel secure and safe during your stay at the venue. It is the organizer's responsibility to ensure that the artist, artist's crew and all their belongings are safe during your stay. Guards/Staff must ensure that no tampering, destroying or stealing anything of artist or crew equipment or personal belongings occurs. It is the organizer responsibility to have adequate insurance to cover damage or theft

Technical Rider

of equipment, personal belongings (artist, crew, local crew, audience, etc.). Organizer is obliged to ensure artists and stage equipment and mixers are well protected. If necessary, using guards and barricades between stage/mixer and audience.

STAGE:

At artist arrival shall stage being cleared and prepared for rigging of backline. The stage must not be less than **24 feet wide and 18 feet deep**. (Local dimensions may vary, please notify us of your stage dimension)

The stage should be proper condition, access only for Security, artist an (local) crew.

No holes or uneven edges that could cause artist tripping.

We are very concerned that the stage looks clean, no cables tossed around etc.

RISERS:

The band needs a drum riser. It should be of stable quality, risers shall have black skirting

Size: minimum 9'wx6'dx1'h

FRONT OF HOUSE PA

Stereo PA must be 3 or 4 way actively split, and should cover the entire premises. Where PA does not cover, it should be set up with delay systems.

The bands engineer (when travelling with us) reserves the right to have access to all of processors /crossover being used. These should either be locked closed or tucked away. The system must be able to deliver 115dB (A) undistorted sound at FOH and be in perfect condition. In some cases where local and/or national laws implicates a maximum sound level or curfew, please notify us of any that may apply. The use of PA should not be associated with risk for crew, stagehands, audience, artist or everyone else involved. The PA shall be of professional quality.

MONITORS:

We need a minimum of **6** high quality monitors/wedges with seperate 6 mixes. The supplied monitors should be designed for loud volume pressure over a long time. The monitors must consist of 1 x 12 "or preferably 1 x 15 '+ 1 piece 2" driver and should be 2 way.

*We also appreciate a sub at the drum kit 1x18"

Technical Rider

BACKLINE REQUIREMENTS: (if required, see contract)

Drum Kit: (Quality DW/Tama) 22" Kick, 8" & 10" mounted toms, 16" floor tom, adjustable snare stand, adjustable drum throne, 6- adjustable boom style cymbal stands. (We will provide snare drums, cymbals and cowbell)
