

Up All Night

My mama said to always be yourself to live a **happy life**
Looking at my baby in my arms I knew **she was right**
My daddy said to grab life by the balls and then **hold on tight**
It'll be a great ride and there's every chance you'll be **up all night**

[CHORUS]

We're gonna have a party gonna have some fun will be **up all night**
The house is full and the music's pumping, this **shit is tight**
It don't take much to have a good time and **feel alright**
When you're dancing to the music having a ball you'll be **up all night**

Knock two times and then come inside
We are going to twist, bump and jive until the morning light
Don't think twice, it's alright
Just come on over anytime we'll be up all night

[CHORUS]

We're gonna have a party gonna have some fun will be **up all night**
The house is full and the music's pumping, this **shit is tight**
It don't take much to have a good time and **feel alright**
When you're dancing to the music having a ball you'll be **up all night**

Knock two times and then come inside
You're just in time for champagne and wine
Don't think twice, it's alright
Just come on over anytime will be up all night

[CHORUS]

We're gonna have a party gonna have some fun will be **up all night**
The house is full and the music's pumping, this **shit is tight**
I ain't found Jesus I ain't found the lord but I've **seen the light**
Dancing to the music having a ball I'll be **up all night**
