

Corporate profile

AxoGen, Inc. is a leading regenerative medicine company focused on the commercialization of its portfolio of proprietary products and technologies for peripheral nerve reconstruction and regeneration.

Peripheral nerves provide the pathways for both motor and sensory signals throughout the body and their damage can result in the loss of function and feeling. In order to improve surgical reconstruction, regeneration, and protection of peripheral nerves, AxoGen has developed and licensed patented and patent-pending technologies, which are used in its portfolio of products. This portfolio includes Avance[®] Nerve Graft, the only commercially available processed nerve allograft for bridging peripheral nerve discontinuities (a gap created when the nerve is severed) of up to 70 mm in length.

AxoGen's portfolio also includes AxoGuard[®] Nerve Connector, a coaptation aid allowing for close approximation of severed nerves, and AxoGuard[®] Nerve Protector, a bioscaffold used to reinforce a coaptation site, wrap a partially severed nerve or isolate and protect nerve tissue. AxoGen is bringing the science of nerve repair to life with thousands of surgical implants of AxoGen products performed in hospitals and surgery centers across the United States, including military hospitals serving U.S. service men and women.

Avance[®]
Nerve Graft
The Natural Connection

Avance[®] Nerve Graft is a decellularized and sterile ECM scaffold processed from human peripheral nerve tissue

AXOGUARD[®]
Nerve Protector
Wrap & Protect

AxoGuard[®] Nerve Protector is an ECM implant designed to provide protection for peripheral nerves

AXOGUARD[®]
Nerve Connector
Align & Connect

AxoGuard[®] Nerve Connector is an ECM coaptation aid that allows for the close approximation of severed nerves

AxoGen is exclusively dedicated to the science and commercialization of nerve repair solutions
