

# AXOGUARD® NERVE CONNECTOR FACT SHEET

AxoGuard® Nerve Connector is the only porcine submucosa coaptation aid allowing for close approximation of severed nerve ends. It can be used to bridge gaps up to 5mm in length and alleviates tension at the repair site. Further, it reduces the number of required sutures (vs. direct repair) and reduces the potential for fascicular mismatch. The AxoGuard® Nerve Connector is strong and flexible, easy to suture and semi-translucent which allows visualization of the underlying nerve.

## About AxoGen, Inc.

AxoGen (NASDAQ: AXGN) is a leading regenerative medicine company dedicated to advancing the science and commercialization of peripheral nerve repair solutions. AxoGen's products offer a full suite of surgical nerve reconstruction solutions. Along with AxoGuard® Nerve Connector, these include Avance® Nerve Graft, the only commercially available processed nerve allograft for bridging severed nerves and AxoGuard® Nerve Protector, a bioscaffold used to reinforce a coaptation site, wrap a partially severed nerve or isolate and protect nerve tissue.

**AxoGuard® Nerve Connector is a coaptation aid which reduces tension at a peripheral nerve repair site.**

The multi-laminar ECM of AxoGuard® Nerve Connector

**Indications:** AxoGuard® is intended for the repair of peripheral nerve discontinuities where gap closure can be achieved by flexion of the extremity.

**Contraindications:** AxoGuard® is contraindicated for patients with a known sensitivity to porcine derived materials.
