

AXOGUARD® NERVE PROTECTOR FACT SHEET

AxoGuard® Nerve Protector is the only porcine submucosa nerve wrap which can reinforce a coaptation site, wrap a partially severed or compressed nerve, and isolate tissue. AxoGuard® Nerve Protector can be used to wrap injured nerves, easily conforms to the injured nerve, and minimizes the potential for soft tissue attachments and nerve entrapment by physically isolating the nerve. Further, it is flexible and easy to suture.

About AxoGen, Inc.

AxoGen (NASDAQ: AXGN) is a leading regenerative medicine company dedicated to advancing the science and commercialization of peripheral nerve repair solutions. AxoGen's products offer a full suite of surgical nerve reconstruction solutions. Along with AxoGuard® Nerve Protector, these include Avance® Nerve Graft, the only commercially available processed nerve allograft for bridging severed nerves and AxoGuard® Nerve Connector, a coaptation aid allowing for close approximation of severed nerves.

Indications: AxoGuard® is intended for the repair of peripheral nerve discontinuities where gap closure can be achieved by flexion of the extremity.

Contraindications: AxoGuard® is contraindicated for patients with a known sensitivity to porcine derived materials.
