

Dürmentingen, 9th April 2018

RED DOT AWARD: Product Design 2018 Rondex-Juwel®

92 is not yet the end!

Besides quality and reliability Georg Schlegel GmbH & Co. KG in Dürmentingen impresses its customers also by an appealing and elegant design. This could convince the jury of the Red Dot Award: Product Design 2018 again and Schlegel got its 93rd award for its products. In the category "Industrial devices, machines and automation" the range Rondex-Juwel® was able to compete against numerous competitors and it continues the success of Schlegel products.

Decisive for the attractive design is the round flat shape of the front ring of only 2 mm height and the fine surface in the colours anthracite and silver. In addition, the range is being completed by an exclusive version in stainless steel.

The robust control unit range Rondex-Juwel® for Ø 22.3 mm mounting diameter comprises illuminated pushbuttons with labelling option, pushbuttons with ring illumination and laser engraving, selector and key switches, buzzers, pilot lights, an emergency-stop and numerous data jacks. Depending on the contact block a mounting depth from 49.5 mm is possible. Screw, cage-clamp or push-in connections are available, also for high switching currents. Depending on the type the degree of protection is IP65, IP65/IP67 or IP65/IP67/IP69K. Further information for the range Rondex-Juwel® is available under www.schlegel.biz.

About Georg Schlegel GmbH & Co. KG

Schlegel stands for innovation, quality and design. Founded in 1945, Schlegel is today a globally operating company with headquarters in Germany, sales offices in Austria and Singapore, and exports to more than 80 countries on all five continents. The core competences: Development and production of control units, pilot lights and terminal blocks. The product portfolio further includes bus systems, enclosures, limit switches, control panels and functional components. When developing new products, Schlegel sets high standards as to the design. More than 90 national and international design awards confirm the company's high level of design expertise, among these prizes are the iF Design Award, the Red Dot Award or the German Design Award.
