

INTERCONNECTION FEASIBILITY STUDY AGREEMENT

This agreement ("Agreement") is made and entered into this ____ day of _____, by and between _____ ("interconnection member-owner"), as an individual person, or as a _____ organized and existing under the laws of the State of _____, and Iowa Lakes Electric Cooperative, ("Cooperative"), a cooperative corporation existing under the laws of the State of Iowa. Interconnection member-owner and Cooperative each may be referred to as a "Party," or collectively as the "Parties."

Recitals:

Whereas, interconnection member-owner is proposing to develop a distributed generation facility or modify an existing distributed generation facility consistent with the interconnection request application form submitted by interconnection member-owner on _____; and

Whereas, interconnection member-owner desires to interconnect the distributed generation facility with Cooperative's electric distribution system; and

Whereas, interconnection member-owner has requested Cooperative to perform an interconnection feasibility study to assess the feasibility of interconnecting the proposed distributed generation facility to Cooperative's electric distribution system;

Now, therefore, in consideration of and subject to the mutual covenants contained herein the Parties agree as follows:

1. All terms defined in Iowa Utilities Board Chapter 45 rules on Electric Interconnection of Distributed Generation Facilities (199 IAC 45.1) shall have the meanings indicated in that rule when used in this Agreement, unless otherwise specified. However, Cooperative's agreement to utilize the definitions found in the Chapter 45 rules shall not be construed as an agreement concerning the applicability of the balance of said Chapter.
2. Interconnection member-owner elects and Cooperative shall cause to be performed an interconnection feasibility study.
3. The scope of the interconnection feasibility study shall be based upon the information set forth in the interconnection request application form and Attachment A to this Agreement.
4. The interconnection feasibility study shall be based on the technical information provided by interconnection member-owner in the interconnection request application form, as modified with the written agreement of the Parties. Cooperative has the right to request additional technical information from interconnection member-owner during the course of the interconnection feasibility study. If the interconnection member-owner modifies its interconnection request, the time to complete the interconnection feasibility study may be extended by the Cooperative.
5. In performing the study, Cooperative shall rely on existing studies of recent vintage to the extent practical. The interconnection member-owner will not be charged for such existing studies; however, interconnection member-owner is responsible for the cost of applying any existing study to the interconnection member-owner specific requirements and for any new study that the Cooperative performs.
6. The interconnection feasibility study report must provide the following information:
 - 6.1 Identification of any equipment short circuit capability limits exceeded as a result of the interconnection,
 - 6.2 Identification of any thermal overload or voltage limit violations resulting from the interconnection, and
 - 6.3 A description and nonbinding estimated cost of facilities required to interconnect the distributed generation facility to Cooperative's electric distribution system

7. Interconnection member-owner shall provide a study deposit equal to 100% of the estimated nonbinding study costs at least 20 business days prior to the date upon which the study commences.
8. The interconnection feasibility study shall be completed and the results shall be transmitted to interconnection member-owner within 60 business days after this Agreement is signed by the Parties or the complete study deposit is received by the Cooperative, whichever occurs later. If the interconnection member-owner's study request involves more than one point of interconnection and configuration, the time to complete the interconnection feasibility study may be extended by the Cooperative.
9. Study fees shall be based on actual costs and will be invoiced to interconnection member-owner after the study is transmitted to interconnection member-owner. The invoice must include an itemized listing of employee time and costs expended on the study.
10. Interconnection member-owner shall pay any actual study costs that exceed the deposit without interest within 30 calendar days on receipt of the invoice. Cooperative shall refund any excess deposit amount without interest within 30 calendar days after the invoice.

In witness whereof, the Parties have caused this Agreement to be duly executed by their duly authorized officers or agents on the day and year first above written.

ATTACHMENT A
Interconnection Feasibility Study Agreement

Assumptions Used in Conducting the Interconnection Feasibility Study

The interconnection feasibility study will be based upon the information in the interconnection request application form, agreed upon on _____:

1. Point of interconnection and configuration to be studied.

2. Alternative points of interconnection and configurations to be studied.

Note: 1 and 2 are to be completed by the interconnection member-owner. Any additional assumptions (explained below) may be provided by either the interconnection member-owner or the Cooperative.
