Covanta Pinellas
2018 Facility Performance

Metal Recovery

The metal recovered in 2018 is equivalent to:

- **28 thousand** cars from recovered steel
- **121 million** aluminum cans
- **33,300 tons** Ferrous
- **1,800 tons** Non-Ferrous
- **Energy savings equivalent to 7.3 million gallons of gasoline**
- **A paper clip chain that wraps around the Earth 51 times**
- **119 thousand** passenger vehicles driven for 1 Year

Net GHG Reduction

Compared to Landfilling, 1 Ton of MSW processed:
- **Reduces lifecycle emissions** by **0.75 Tons of Net CO2e**

In 2018, the plant **avoided emissions** equivalent to:
- **119 thousand** passenger vehicles driven for 1 Year
- **Burning 613 million** pounds of coal

* Life Cycle calculations are based on facility operating data, local electrical grid, and U.S. national average landfill practices

Average Annual Facility Emissions

2016-2018 EfW Emissions Compared to Federal Standards

Covanta Pinellas operates up to 99% below federal emissions standards

Emissions compared to federal guidelines for existing facilities (40 CFR 60 Subpart Cb).
Facility may be subject to more stringent requirements by permit or in accordance with other federal guidelines.

Electricity Generation

The electricity produced at the plant:
- Provides electricity for **39.4 thousand** homes for 1 Year
- Can fully charge a Tesla Model S vehicle **4.2 million** times

Covanta Pinellas - 2018 Facility Performance

EfW Continuous Emission Monitoring Compliance Performance**

100.00%
2018

* Based on the 2014 US EPA National Emissions Inventory; the most recently released complete inventory.
Where available, the facility’s 2014 emissions were replaced with the reported 2018 emissions.
** Percentage of hours in compliance with CEMS emissions standards
