

Covanta Marion

2018 Facility Performance

Metal Recovery

Ferrous
7,100 tons

Non-Ferrous
400 tons

The metal recovered in **2018** is equivalent to:

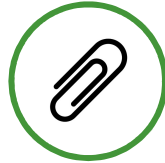

6 thousand cars from recovered steel

Energy savings equivalent to **1.6 million** gallons of gasoline

A paper clip chain that wraps around the Earth **11** times

28 million aluminum cans

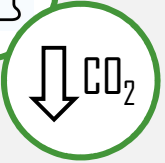

Net GHG Reduction

Compared to Landfilling,
1 Ton of MSW processed

Reduces lifecycle emissions* by

0.77 Tons of Net CO₂e

In **2018**, the plant **avoided emissions** equivalent to:

26 thousand passenger vehicles driven for **1 Year**
Burning **134 million** pounds of coal

* Life Cycle calculations are based on facility operating data, local electrical grid, and U.S. national average landfill practices

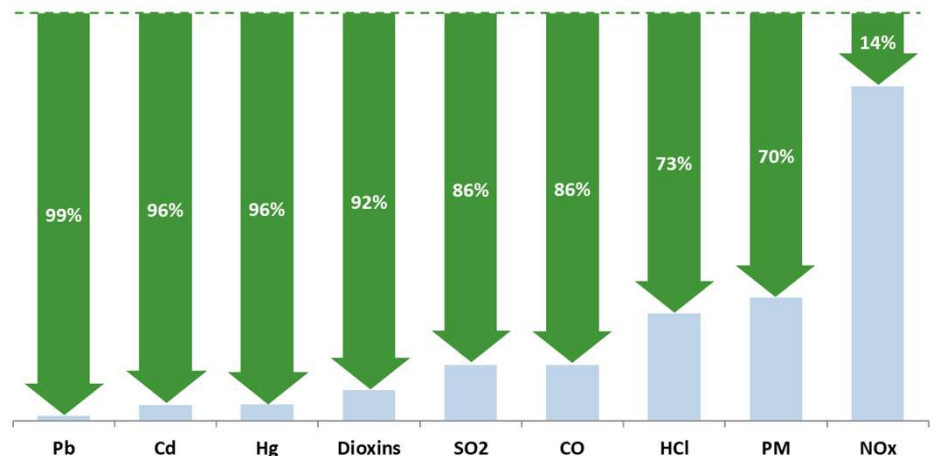

Average Annual Facility Emissions

2016-2018 EfW Emissions
Compared to Federal Standards

Covanta Marion operates up to **99% below** federal emissions standards

Emissions compared to federal guidelines for existing facilities (40 CFR 60 Subpart Cb). Facility may be subject to more stringent requirements by permit or in accordance with other federal guidelines.

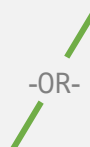

% BELOW FEDERAL STANDARD

Electricity Generation

The electricity produced at the plant:

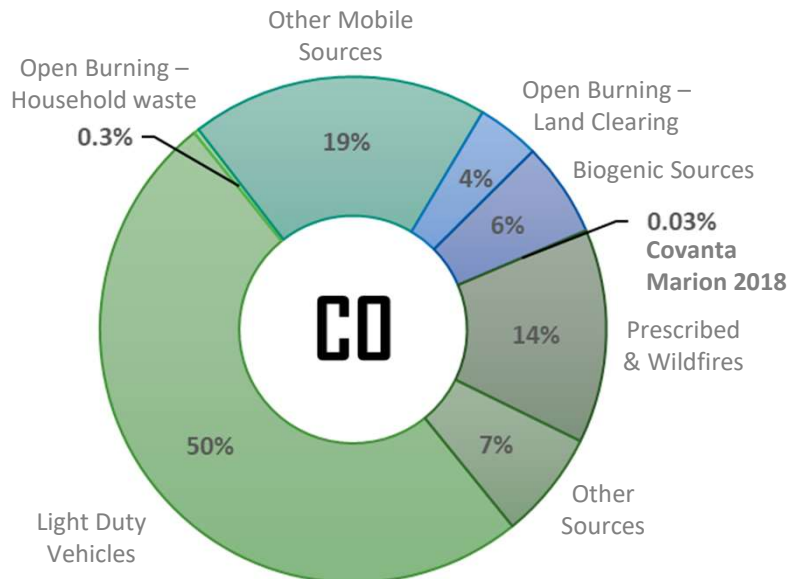

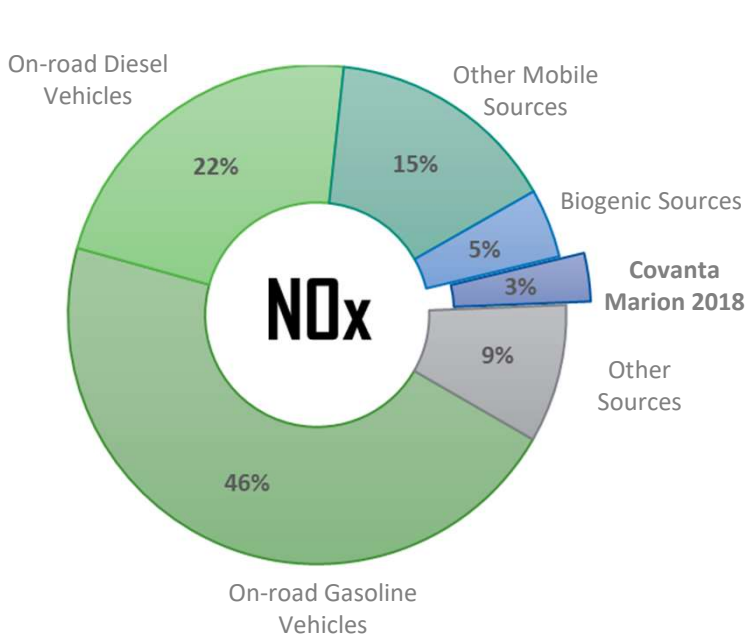

Provides electricity for **6 thousand** homes for **1 Year**

Can fully charge a Tesla Model S vehicle **700 thousand** times

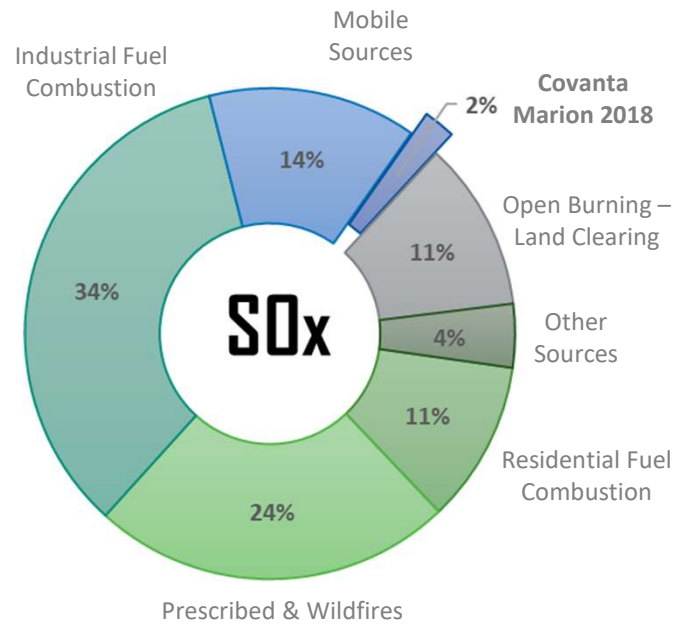

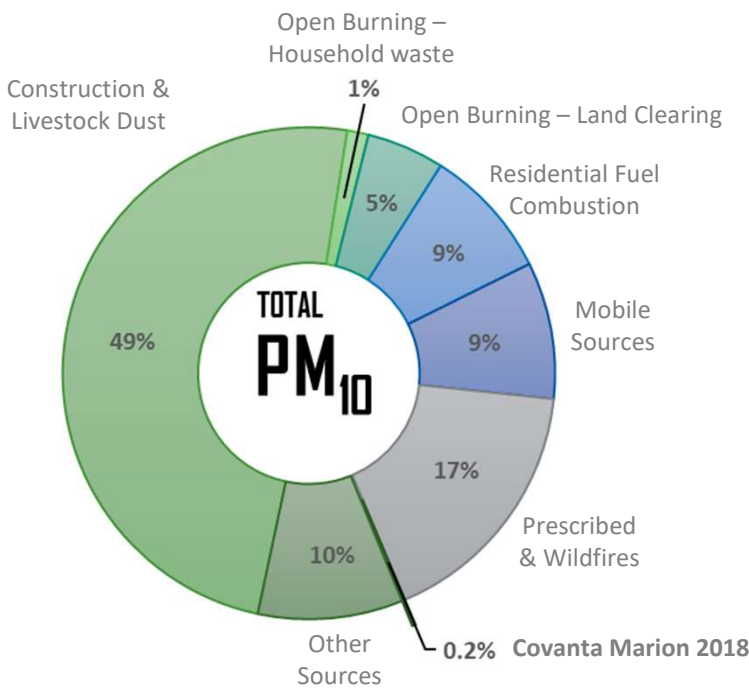

How Do Our Emissions Compare to Other Sources in the County?

Local air emissions* in Marion County, OR

EfW Continuous Emission Monitoring Compliance Performance**

100.00%
2018

(excluding road dust, which is 78% of total inventory)

* Based on the 2014 US EPA National Emissions Inventory; the most recently released complete inventory. Where available, the facility's 2014 emissions were replaced with the reported 2018 emissions.

** Percentage of hours in compliance with CEMS emissions standards
