DISCRETIONARY SELECTION

USA Cycling may choose to fill quota slots through the discretionary selection criteria below in order to select athletes with medal capability or those that will achieve the best predicted finish for USA Cycling in the Time Trial.

Discretionary Criteria

The USA Cycling National Team coach will recommend athletes, according to the criteria below, to the USA Cycling Selection Committee for selection to the Pan American Championships Team through discretionary selection. The Selection Committee will review data on all petitioning athletes when considering the recommendations. The USA Cycling Selection Committee will consider the following criteria:

- A. **Medal Capable Athlete**– A medal capable athlete is one who has clearly demonstrated the ability to produce a medal winning result in the competition for which the athlete is being selected for by achieving one of the following criteria:
- Winning a medal (top 3 finish) within the last 24 months at the most recent World Championships and demonstrating the continuing ability to perform at that level or higher based on performances in International Competition in the last 12 months or
 - Beating previous year’s Worlds medalists or current top UCI world ranked athletes in International Competition on courses similar to the event for which the athlete is being selected on multiple occasions in the past 12 months; or
 - A top three finish on a course with similar profile and against similar competition to those expected for the event for which the athlete is being selected within the last 12 months.
- B. **Future Medal Capable Athletes**– An athlete who is future medal capable is one who has the potential to produce a medal winning result within two future Olympic Games cycles at a World Championship or Olympic Games by:
- Demonstrating a trend of improving performance in International Competition that, when logically extended out two future Olympic cycles, in consideration of the athlete’s development path, intersects the future World Championship or Olympic standard for the event under consideration; or
 - Winning medals at Junior or U23 World Championships

- C. Best Predicted Finish- The USA Cycling Selection Committee may choose the athlete or athletes who are most likely to finish the highest in the event based on data described below.

Importance of International Competition

As used herein, “International Competition” includes any competition in which the field of athletes is sufficiently strong that performances in that competition are indicative of how an athlete can perform in the competition that the discretionary selection is for. International Competitions need not occur outside the United States, as “international” refers to the competitiveness of the field (i.e., includes many of the best riders from leading cycling nations around the world), not the location of the event.

Data to Support Discretionary Selections

Recommendations for discretionary nominations will be made by the USA Cycling National coaching staff. However, the USA Cycling Selection Committee will review data on all petitioning athletes and approve ALL athlete nominations using the discretionary criteria described below. In addition to performances in International Competition or competitions specified in the Athlete Selection Procedures, the Selection Committee may consider for discretionary selections, as appropriate to the discipline, the following:

- For all selections – Validatable and credible performance data such as times on courses (or portions of courses) of similar length or course profile and/or in similar environmental conditions to the event being selected for; or athlete power data;
- For choosing between two athletes in a selection category (medal capable, future medal capable, or best predicted finish) – Data may include any or all of the following in no specific order of priority. The inclusion and order of priority for any data set may be different from event to event as determined by the USA Cycling Coaching staff and USA Cycling Selection Committee.
 1. Race results in top international competitions;
 2. Race results in top national level competitions;
 3. Head to head competition results or performances between multiple athletes in consideration for a discretionary position;
 4. Technological data on athlete and/or event which is validatable and credible. By way of example this could include but is not limited to: times on similar courses or events, athlete power data, or event demand data.

USA Cycling Selection Committee

Recommendations for discretionary nominations will be made by the USA Cycling National coaching staff. However, the USA Cycling Selection Committee (see the USA

Cycling website for the list of Selection Committee members) will review and approve ALL athlete nominations using the criteria outlined above.

Conflict of Interest

Any member of the selection committee that has a possible conflict of interest must disclose it. Another member of the Selection Committee may also raise a potential conflict of interest of another member. For any conflict raised, the remainder of the selection committee will decide if the conflict is material by vote. In the case of a tie, the tie will be broken by the USA Cycling Vice President of Elite Athletics. If such conflict exists, the selection committee member must recuse him/herself from committee discussions and voting. Further, the committee member should not otherwise influence other members of the committee in the nomination process. However, a committee member who recused him/herself, but who has relevant and necessary information with respect to athlete performance, may, if requested by the selection committee, provide such information to the committee so long as such information is provided in a fair and unbiased manner and the committee member who declared the conflict of interest does not vote toward the final decision.
