Insights

Fuelit app is for all the travelers who love to take the roads but recoil from the long waiting queues at the gas station. The innovative app advances upon the concept of eCommerce to offer the users with the convenience of vehicle refueling at their doorstep. It works on a subscription-based method where the customers can subscribe to the service for one or more vehicles with option of fuelling up once or twice a week. Customers can also customize their delivery timings as per their need or cancel a delivery at any time.

Project Features

- ✔ Sleek and intuitive user interface
- ✔ Different apps for fuel providers and consumers
- ✔ Transaction history
- ✔ Track fuel orders
- ✔ Receive in-app notifications for requests and deliveries
