

## A robust e-Commerce Platform that can be Customized to Users' Needs

Website url : [http://stageofproject.com/mobile/user\\_login](http://stageofproject.com/mobile/user_login)

The project involved the development of a fully-functional eCommerce website that connects local vendors to an online platform where they can sell their products and add their customers to the website's user base.

### Insights

A platform developed using powerful MERN technology stack and modern age features for quick and efficient deployment of an eCommerce solution according to the client requirements. The customizable platform allowed users to use a software solution that integrates with the website and software systems. Users also get 24/7 access to their sales metrics, so the revenue generated can be monitored regularly and improved in the long term.

### Project Features
