EHR SOFTWARE PRICING GUIDE

The Latest Pricing Information from Leading Vendors

EHR is an essential tool nowadays, and it has a price. Healthcare providers usually think of it as a one-time investment and jump directly into getting it. Later, they are taken aback, due to the hidden costs. Here are a few things to know about EHR pricing, before investing.

Deployment Models

There are two deployment models.

- On-premise
- Cloud-based

The first is to deploy it on-premise, which means that health providers will have the EHR installed on their servers in the organization. The second deployment option is cloud-based, which means that their data will be stored on the vendor's servers and they would be able to access it through the internet.

On-Premise Cost

If health providers choose the on-premise model, then they need to be aware of all the costs that come along with it. The first cost is of the EHR itself. Health providers must pay to get the license of the software.

The second cost is of servers. To make the software available for use, it needs to be installed on servers. Keep in mind the cost of maintenance. An IT team would be needed for the maintenance of the servers.

Then comes the cost of computers, laptops or workstations that are needed for the employees, so that they can use the software. Organizations might need to upgrade their network, so that physicians can access the data available on the EHR anywhere at any time.

Patient's data in the software is confidential, so it needs to be secured. Security tools include firewall, encryption, and network monitoring. The staff also needs to be trained for securing data.

If the software selected is not according to the organizations needs and wants, it must be customized. Software keeps upgrading with time, and new features are added. All of these are the on-premise model costs.

Cloud-Based Cost

While choosing the cloud-based model, health providers must further select a subscription plan according to the organization's requirements. There is an initial fee that health providers may pay at the time of subscription. Often the network in the organization needs to be upgraded, so that data can be transferred back and forth without any interference.

In this model, the servers, laptops, computers, maintenance and security costs are not present, as the vendor oversees hosting. Albeit, there is a limitation to how many employees can access the software. In some cases, the price is increased as the number of users grow. This model has an ongoing monthly or annually subscription fee.

Costs Common in Both Models

There are a few hidden costs that are common for both models, on-premise and cloud-based. Health providers will need to get their physicians, nurses and office staff trained to use the software, which will cost them.

On-site training costs more than online training. With online training you will get around 10 to 20 hours of training for free while any additional training usually comes at a cost. A good vendor also offers online training videos for each module which you can use to train new users.

Keeping all these points in mind, here is a list of EHR pricing for 2019.

	EHR VENDOR	EHR PRODUCT	PRICING MODEL	COST	Source
1.	Advanced MD	AdvancedMD EHR	Monthly subscription	\$729 / provider	
2.	Amazing Charts	Amazing Charts EHR	Monthly subscription	From \$125 / provider (\$1495 setup fee)	
3.	BestNotes	BestNotes	Monthly subscription	\$50 per user (\$20 per user after 10 users)	
4.	CareCloud Central	Care Cloud EHR	Monthly subscription	From \$379 / provider	
5.	ChartLogic	ChartLogic EMR	Monthly subscription	\$350 / provider	
6.	ChartLogic	ChartLogic PM	Monthly subscription	\$350 / provider	
7.	Charm Tracker	ChARM EHR	Monthly subscription	From free	
8.	ChiroTouch	ChiroTouch EHR	Monthly subscription	\$249 / month all inclusive	
9.	Clinic Source	Therapy EMR	Monthly subscription	\$59.95 / user	
10.	Cure MD	CureMD EHR	Monthly subscription	\$295 / provider	
11.	drchrono	drchrono EHR	Monthly subscription	\$119 / provider	
12.	eClinicalWorks	eClinicalWorks EHR	Monthly subscription	\$449 / provider	
13.	Elation Health	Elation EHR	Monthly subscription	\$349 / provider	
14.	eMDs	eMDs Practice Choice	Monthly subscription	\$499 / provider	
15.	ICANotes	ICANotes EHR	Monthly subscription	\$155 / provider	
16.	ISS	MedEZ	Monthly subscription	\$45 / provider	

17.	iPatientCare	iPatientCare EHR	Monthly subscription	\$399 / provider
18.	iSALUS Healthcare	OfficeEMR	Monthly subscription	\$149 / provider
19.	Kareo	Kareo Clinical	Monthly subscription	\$300 / provider
20.	McKesson	iKnowMED EMR	Monthly subscription	\$349 / provider
21.	MD Synergy Solutions	MDS chart	Monthly subscription	\$395 / provider
22.	Net Health	ReDoc powered by xfit	Prime Clinical EHR	From \$75 / provider
23.	OEMR	OpenEMR	Free	Free
24.	Open MRS	OpenMRS	Free	Free
