

DIGITALIZATION RESULTS - STREAMLINING OPERATIONS & IMPROVE EFFICIENCY

Case Study: Automobile: Application Transformation

The Challenge

A US based Automobile dealer wanted to develop a custom build document management system for managing

- New sale / resell
- Service
- Warranty

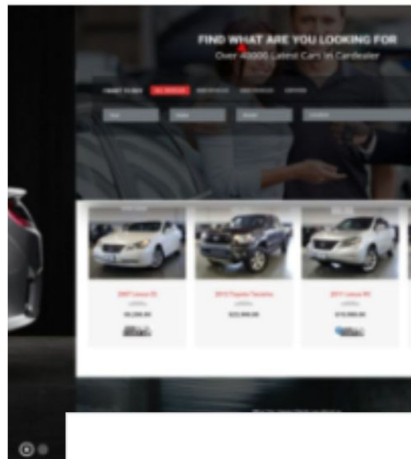

Reducing high administrative costs and Minimize document process delay. Also, the dealer was looking for cost-effective maintenance.

Our Approach

FullStack Techies developed a client-side application with cloud integration that can store various document types including image files, Word, PDFs, Emails, and spreadsheets. Integrated search and filter option to the entire library of files by keyword. Enabled interaction and access, and share documents with other applications.

Accelerating Application Transformation to Scale-up Operations:

The application delivers numerous benefits, including faster processing with greater consistency. The application and its modular design can be further customized and scaled for future needs in other types of documents and transmission modes.

RESULTS

60%

Reduction in administrative costs

50%

Reduction in end-to-end cycle time

Increased

Process efficiencies

AIMLEAP Full-Stack Techies

AIMLEAP – Full-Stack Techies is a global technology consulting and service provider. Our key service offerings include end-to-end IT services, BI & Analytics, and Automation.

- An ISO 9001:2015 and ISO/IEC 27001:2013 certified
- 550+ Happy customers
- 9+ Years of industry experience
- 98% Client Retention
