

Electronic invoicing with Odoo

Increase the agility of your business with innovative processes.

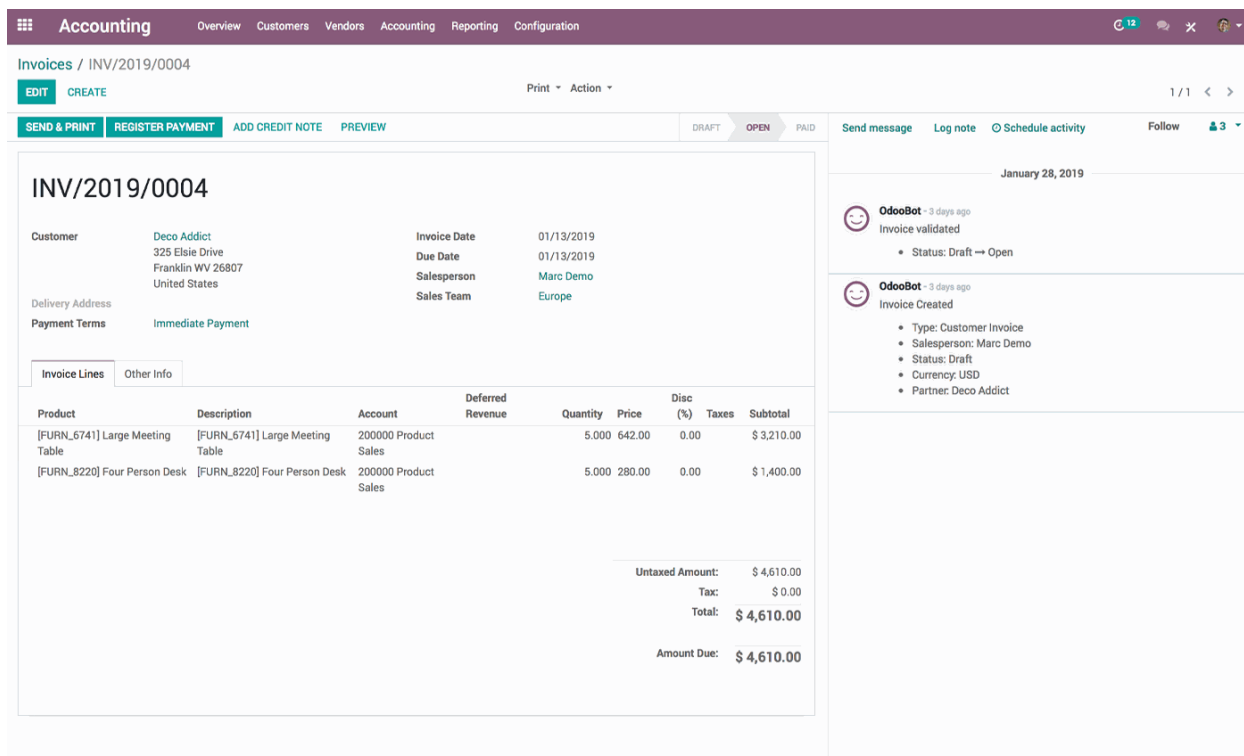

At Rootstack we work on the integration of Odoo with the electronic invoicing module, to make it possible to issue invoices electronically and streamline this entire process.

What is electronic invoicing?

It is a document that records and supports commercial transactions, including transfers of goods and services. It is issued, signed, transferred and stored digitally, being generated by the seller, sent to the client and always authorized by the DGI in Panama.

When invoiced, the company sends the document to the Qualified Authorized Supplier (PAC) for corresponding authorization in a matter of seconds, after which it can be delivered to the customer by email.

The screenshot displays the Odoo Accounting interface for an invoice. The top navigation bar includes 'Accounting', 'Overview', 'Customers', 'Vendors', 'Accounting', 'Reporting', and 'Configuration'. The main header shows 'Invoices / INV/2019/0004' with 'EDIT' and 'CREATE' buttons. Below this are tabs for 'SEND & PRINT', 'REGISTER PAYMENT', 'ADD CREDIT NOTE', and 'PREVIEW'. The invoice details section shows the customer 'Deco Addict' with address '325 Elsie Drive, Franklin WV 26807, United States'. The invoice date is '01/13/2019', due date is '01/13/2019', salesperson is 'Marc Demo', and sales team is 'Europe'. The payment terms are 'Immediate Payment'. The invoice lines table lists two items: 'Large Meeting Table' and 'Four Person Desk', both with a quantity of 5.000. The subtotal is \$3,210.00, and the total amount due is \$4,610.00. The right sidebar shows a timeline of events: 'Invoice validated' and 'Invoice Created'.

Product	Description	Account	Deferred Revenue	Quantity	Price	Disc (%)	Taxes	Subtotal
[FURN_6741] Large Meeting Table	[FURN_6741] Large Meeting Table	200000 Product Sales		5.000	642.00	0.00		\$ 3,210.00
[FURN_8220] Four Person Desk	[FURN_8220] Four Person Desk	200000 Product Sales		5.000	280.00	0.00		\$ 1,400.00

Untaxed Amount: \$ 4,610.00
 Tax: \$ 0.00
 Total: \$ 4,610.00
 Amount Due: \$ 4,610.00

Benefits of implementing the Odoo electronic invoicing module

- Verification and authorization of invoice statements before the General Directorate of Revenue (DGI) of the Republic of Panama.
- Creation, configuration and sending of electronic invoices online.
- Reduction of printing costs and storage of tax information in one place.
- Verification of the Single Taxpayer Registry (RUC) of your clients automatically before the DGI.
- We are partners of The Factory Hka Corp.

What does your business get with Odoo e-invoicing?

01

Electronic bills

You will have access in electronic format to documents such as invoices, credit notes, debit notes.

02

RUC validation

Through web services, you can validate the RUC of the companies when the electronic invoice is being issued.

03

Invoice cancellation

This Odoo electronic invoicing module allows you to cancel invoices.

04

Tax printing

The Rootstack team also worked on fiscal printing, allowing printing from the same Odoo platform.

Odoo and our integration with the electronic invoicing module guarantees high efficiency for companies, also offering a platform with an intuitive and easy-to-use design.

One of the main attributes of Odoo is that, being an open source platform, it is **completely customizable and flexible**, which any company can configure according to its needs, making the appropriate integrations according to its flows.

It must be clear to companies that this type of Odoo integrations does not mean that the team's work will now be more complicated: **on the contrary, guaranteeing usability is the main goal, so that the adaptation of employees is as harmonious as possible.**

We are constantly looking for innovative ways to improve and optimize software, adopting the latest technologies and industry best practices to deliver cutting-edge solutions to your customers.
