

Shopify measurement module for your e-Commerce

Increase the agility of your business with innovative processes.

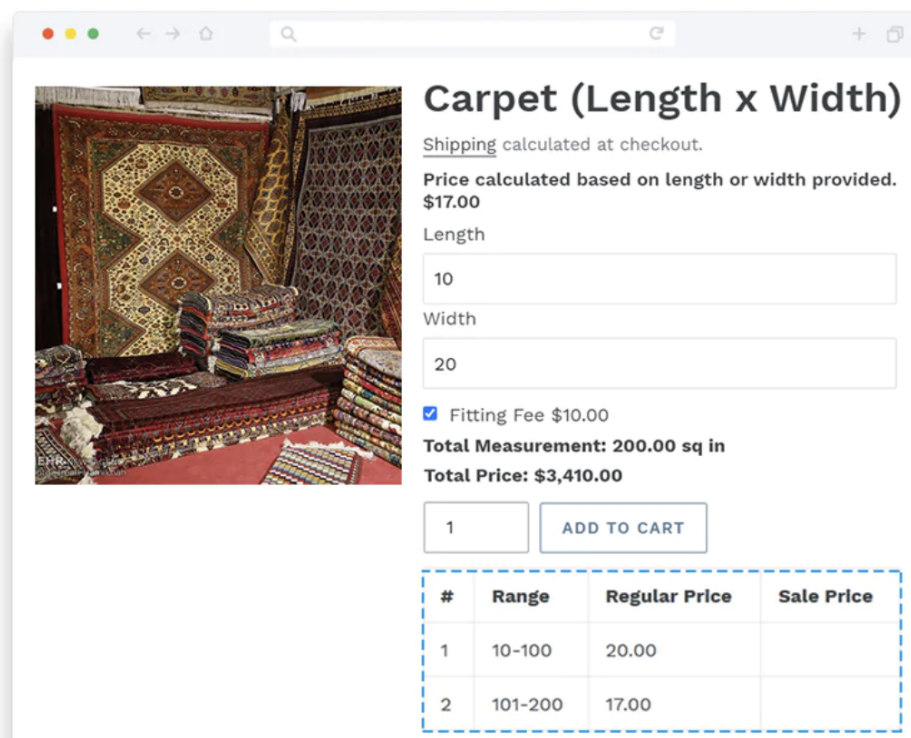

We developed the Shopify measurement module to facilitate the calculation of prices for your products using units of measurement. Boost your business with this implementation.

Make pricing calculations easy with Shopify measurement

With Shopify Measurement, your business can significantly improve efficiency by simplifying the pricing process. This integrated tool allows customers to quickly calculate the cost of their products based on precise measurements, such as length, weight and area.

By automating this process, the possibility of errors is reduced and the sales flow is streamlined, offering your customers a more transparent purchasing experience.

Carpet (Length x Width)

Shipping calculated at checkout.

Price calculated based on length or width provided.
\$17.00

Length

Width

☒ Fitting Fee \$10.00

Total Measurement: 200.00 sq in

Total Price: \$3,410.00

#	Range	Regular Price	Sale Price
1	10-100	20.00	
2	101-200	17.00	

Benefits of implementing Shopify measurement

- You can sell products based on different measurements.
- Your customers can calculate the price of your products by various units of measurement, such as length and weight, for example.
- Keep measurements on the cart and order details page.
- You can set maximum and minimum limits for each measurement dimension.

What does your business get with Shopify measurement?

01
