

SYNCLATURE 

Mitigating Business Risk

COMPANY PROFILE

“

The single biggest **existential threat** that's out there, I think, is cyber.”

- Michael Mullen

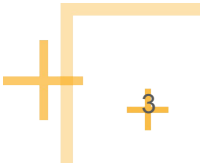

Admiral, US Navy (Retd.),

Ex-Chairman of the Joint Chiefs of Staff

ABOUT US

- Synclature is a business consulting firm that provides strategic consulting, information assurance, technology and cyber risk services to private, public and government clients across India, Ireland, New Zealand, Singapore, Malaysia, Saudi Arabia, UAE, UK, and the US.
- Formally established in 2013, Synclature has been rendering services to industry sectors such as banking, insurance, education, hospitality, healthcare, research, manufacturing, petrochemicals, pharma, telecom, FMCG, e-commerce and IT.
- With a team of experienced domain experts and certified professionals, our risk mitigation advisories enable major corporate clients and startups to secure their information assets.

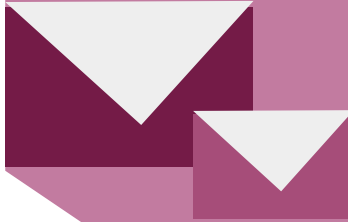

\$6 trillion

Annual
estimated
cyber crime
damage cost
by 2021.

Phishing

#1 vector of
cyber attack
in 2016

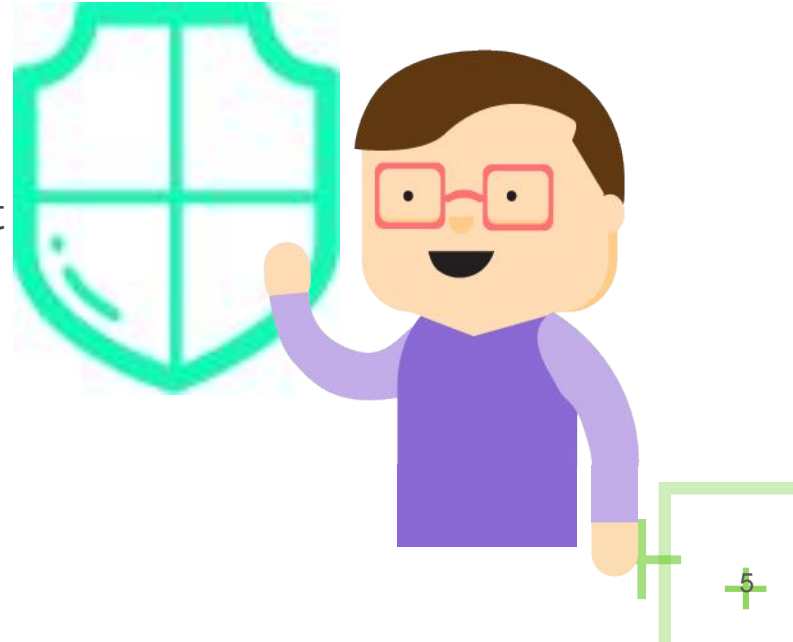

\$5 billion

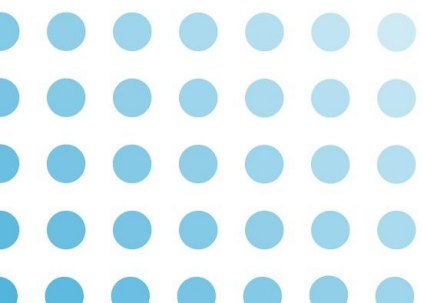

Estimated

EXPERIENCE HIGHLIGHTS

- Conducted appsec for global entities to safeguard their critical information assets.
- Consulted on GDPR readiness for maritime services providers.
- Executed a project in Saudi Arabia for the OT technical assessment, encompassing ICS, SCADA, IT and network assets, for the third largest petrochemical company in the world.
- Performed data center audit and IT risk assessment for a government entity in Abu Dhabi.
- Reviewed and audited moderate risk applications like debit card management and reconciliation systems for security and process flaws.
- Deployed and managed endpoint security technologies for large financial institutions and telecom provider
- Successfully investigated and recovered illegitimately transferred funds in cross-border cyber frauds.
- As a part of our incident response, we provide forensic technology services for servers, desktops, mobile devices etc. depending on the requirement and target systems. We have successfully delivered projects for a US-based healthcare research entity, investigating internal data theft and exfiltration.
