Pressing Challenges

Structured Management of Training courses for Students to choose from and ensure seamless and agile Learning Synchronized and planned stakeholder interaction, a proper trainee and trainer communication platform was a big challenge aiming to provide a great end user experience.

Management of Training content, Videos, study Material, resumes and Doubt sessions was priority concern. Lack of Reports and analytics to attain information of user activity, Content access, Faculty and Student interactions and Live classes was one another roadblock as the in-person teaching was badly hampered post COVID-19.

Solutions By A World Class Web Portal And Website

A structured Course management system was created to ensure Programs and Courses with respect to Certifications can be managed in tandem and ensures a clear embarking segmentation of Program wise course-wise and Topic wise material management for better access and control.

Video Lessons and study material access were made more brisk and quick to access with better quality and Lead time.
