## Deloitte Mobile App Development

As a result of in-depth market research, a mobile app was developed that provided mentorship opportunities to graduates.

Ed Vincent,

# Deloitte Mobile App Development

## Company Bio

Industry: Fintech

[Deloitte](#) provides audit, tax, consulting, enterprise risk and financial advisory services. Deloitte is one of the “Big Four” accounting organisations and the largest professional services network in the world by revenue and number of professionals.

## Problem

Deloitte Audit Graduate Recruitment were looking to improve the probability of graduate candidates joining their firm. They were having problems with their recruitment system since there was a big gap between approach and hire.

# SovTech Solution

Stack: Mobile & Web (React Native, React Js)

Project Scope: UX Design | UI Design | Software Development

As a result of in-depth market research, a mobile app was developed that provided mentorship opportunities to graduates as well as a simple way to join Deloitte competitions, submit results and attend Deloitte events. This connects to an Applicant tracking system which we also manage. We built this recruitment platform for them. This system is a cross-platform instant messaging application that allows candidates to communicate with a CA as well as upload their marks enabling the assessors at Deloitte to make better recruitment choices faster.

The solution resulted in overall improved efficiency. Time is saved, Recruitment data is managed and tracked accurately, Improved employee onboarding plans, On-demand reporting, Employee development plans and reduced human errors.
