

## JLL

Jul 2017 — Ongoing

PROJECT SIZE \$200,000 to \$999,999

### Global Real Estate Platform Improvement: JLL

JLL is a platform that assists users in buying, building, occupying, and investing in real estate assets.

Challenges:

- Improve the platform's performance and user engagement.
- Ensure robust security and data protection.
- Create conditions for expansion into global markets.

Solutions:

- Optimized website performance and implemented security updates.
- Improved platform durability to handle increased traffic.
- Integrated Azure Cloud DevOps, Salesforce, and Sitefinity.

- Transitioned from single-host to multi-tenant architecture.
- Automated processes and unified datasets.
- Added support for APA and MENA regions.
