Dispatch Health

Oct 2021 — Ongoing

PROJECT SIZE \$10,000 to \$49,999

Healthcare Platform Development: DispatchHealth

DispatchHealth is a healthcare platform providing urgent care at home, a convenient alternative to ERs and hospitals.

Challenges:

- Automate the processes to improve platform performance.
- Optimize backend systems to handle requests more effectively.
- Integrate 3rd party services.

Solutions:

- Migrated Ruby code to Golang.
- Migrated the project to a Monorepo.
- Split the monolith app into microservices.
- Developed internal tools to accelerate the development process.

- Automated processes to minimize human input.
 - Integrated 3rd party services.
-
