CYANIC
HSE

Electronic Health & Safety
Product Overview

What is it?

Cyanic HSE is software that **saves you time and money** by automating your safety and regulatory programs. Cyanic HSE includes all the features you need to benefit from a digital workflow:

- Instantly search and report on all of your data
- Automatically monitor and enforce compliance
- Works on the desktop, iPhone/iPad and Android devices

Please see our website for a complete list of features and technical details.

Why Cyanic HSE?

It's a great time to switch to digital, and you have many capable HSE applications to choose from.

We think the best thing about Cyanic HSE is the company behind it. *Cyanic Automation* is an **Edmonton**-based software company that works with you, and we make sure your experience is as **easy** and **pleasant** as possible.

We want our customers to know that they can just give us a call if they need anything, and the work will get done quickly and without hassle.

It's so easy (really!)

We know your time is important, and everything about Cyanic HSE is designed to make your life easy:

- Runs in the *cloud,* so you don't need to buy equipment or maintain anything
- We will meet with you and set up your entire system according to your needs
- Cyanic HSE is **incredibly simple to use**

It does the hard work for you

Computers are supposed to make life easier, so let's make them do the heavy lifting.

- Gather all of your audit materials with a few mouse clicks
- Automatically task the right person when non-compliance is detected
- Instantly see who hasn't completed required training, and when certifications are about to expire
- Analyze data patterns and see how well your business is performing

More than just safety

HSE automation is just one part of improving your operations. Take advantage of a growing list of modules that run on our unified business platform:

- **Enterprise Resource Planning**: Costing, planning and timesheets.
- **Customer Relationship Management**: Track your customers and sales activity.
- **ISO**: Automate your own *ISO 900X* program.

Make it yours

We know you want your system to look like *your system*, and we've got you covered:

- All displays can be branded and personalized to fit your company
- Style your form PDF exports to perfectly match your existing forms
