

■ THE IDU PLATFORM

Built for the manager. Trusted by finance.

IDU brings budgeting, forecasting, and reporting together in one platform – connected to your ERP, built for the people who need it most.

AI-assisted scenarios.

Stress-test assumptions and see the impact across the model – instantly. Multi-year forecasts, side-by-side comparisons, predictions trained on your own history.

The whole organisation, planning together.

Finance, operations, and managers all working in one model. Real ownership, real accountability, no version conflicts.

Cycles in weeks, not months.

Cut budgeting and reforecasting time by up to 70%. Submission, consolidation, and approval – governed in one place from day one.

Connected to your ERP.

SAP, Sage, Microsoft Dynamics, NetSuite, Xero, Oracle. 19 native integrations. Live actuals, single source of truth, no manual reconciliation.

■ DESIGNED FOR PEOPLE, BUILT FOR AGILITY

Intuitive enough for every manager. Trusted enough for finance.

Unlike enterprise systems built for power users, IDU is intuitive enough for everyone in the business. Real-time insights to decision-makers, guided inputs that strengthen ownership across the organisation.

■ THE PLATFORM

Everything you need to plan, forecast, and report. In one platform.

Budgeting & Planning

Replace spreadsheets with a governed environment. Every manager owns their numbers.

Forecasting

Driver-based, periodic and rolling. Connected to your ERP actuals.

Modelling

Top-down, zero-based, assumption-driven. AI-powered scenarios.

Capex Planning

Multi-year capital, tied to your budget and asset register.

Cash Flow Planning

Cash position updates everywhere assumptions change.

Consolidations

Multi-entity, multi-currency, fully governed. No bolt-on.

Sales & Operational Planning

Bridge what ops delivers and finance reports.

Reporting & Dashboards

Live dashboards. Drill from group to GL transaction.

Fixed Assets

Full asset lifecycle. Web-based, mobile-friendly.

■ DEPLOYMENT

Same functionality. Your environment.

IDU Azure Cloud Azure-powered SaaS, fast to deploy.

On-premise In your own data centre.

Private cloud Cloud provider of your choice.

■ GET IN TOUCH

See IDU on your own data.

Most teams are budgeting in IDU within weeks of kickoff.
