

VISUAL PLANNING

OPTIMIZE YOUR
RESOURCE
MANAGEMENT
INCREASE
PRODUCTIVITY
WITH EASE

Effectively manage teams, access and share information in real time, plan activities, customize and broaden the view of your operation - all this is possible with one single solution.

Visual Planning enables the allocation of resources and allows you to share schedules with colleagues, customers and partners to work together more efficiently.

Visual Planning is the technology that will launch your activity management to the next level.

Visual Planning is the only solution you need for daily resource management

A robust, customizable application, Visual Planning meets all scheduling and resource management needs, expectations and goals in all types of environments.

Drag and drop

User-friendly solution that is simple to use and easy to learn.

Real-time collaborative management

Centralize, organize and share powerful schedule information.
Save time and eliminate errors, simplify scheduling tasks.

Multi-dimensional structure

Implement and manage unlimited types of resources to schedule tasks as needed.
Define relationships and dependencies between resources and events - you make the rules!

Custom schedules

Personalize schedules and dashboard views.
Customize displays, texts, colors and graphics with a fully configurable package that adapts to specific needs.

Constraints

Define business rules for each category of tasks.
Achieve optimum control over your resource availability and management.

Filters

Sort, filter, and find essential information quickly and easily.
Access and view data in multiple ways.

Event valuation

Assign fixed or calculated event values for instant visibility of costs and time spent.

Workload and event reports

Identify and smooth out workload peaks to maximize resource efficiency.
Generate real time reports to ensure consistency of workflow and accurately assess current data.

Imports/exports in CSV, MySQL, SQL Server and Oracle formats

Easy integration and data exchange with existing internal systems (ERP, CRM, CMMS...).

Remove data duplication and generate automated updates.

Mobility (VP Portal)

Access and update information on mobile devices directly with remote users in the field.

E-mail, RSS, iCal, mail merge

Share information systematically with individuals and teams.
Collaborate effectively.

Geolocation

Optimize, track and monitor schedules based on distance criteria.

Control columns

Control costs, performance and time scales.
Utilize color coding to establish visual cues for thresholds and status instantly.

Visual Planning - the complete long-term solution that paves the way to your company growth

THE SOLUTION

Since 1996, the Visual Planning mission has remained the same: to provide customers immediate productivity with a comprehensive, flexible, configurable and integrated solution.

Available in the cloud or on premise, each Visual Planning solution is adapted to the scheduling and business processes of every customer to improve the quality of their strategic decisions.

The growing adoption of Visual Planning, from small organizations to worldwide, multi-national corporations, is testimony to the power, agility and effectiveness of the solution. Stillog IST has steadily increased its' presence with newly formed teams and partners in the US, France and the UK.

THE COMPANY

Founded in 1991 in France by Christophe Poirmeur and François Berthelot, Stillog IST is the publisher of Visual Planning and provides custom programming services.

By joining in 2014 the ICE Group, an engineering and technology consortium with its 650 employees and multiple sites in France and Europe, Stillog IST has found a synergistic partner that shares their common vision of growth and delivering excellence in service and solutions to its customers.

Focused on expansion and providing complementary solutions, Stillog IST has renewed energy and strategic positioning for long term success as an individual entity and a member of a larger, thriving corporate community.
