

A large Pharmaceuticals company finds a way to give quicker access to the multiple applications needed to do business daily.

COMPANY

- Pharmaceuticals
- Users : 1500

APPLICATIONS

- Multiple SAP Thick Client System
- Web Applications : 20+

CHALLENGES

- Multiple Logins to Remember
- More Time Spent On Logging Into Individual Apps
- Loss of Productivity

RESULTS

- Enhanced User Experience
- Increase in User Productivity
- Reduced Need For Multiple Logins
- Quick Access to all Apps

INTRODUCTION

The company produces Ayurvedic Healthcare products and has offices in India, United States, Middle East and Europe, and sells products in 90 countries.

THE BUSINESS CHALLENGE

This enterprise has multiple SAP systems and more than ten web applications that required logging into each individual application daily. The users reported experiences that were frustrating, time consuming and resulted in tremendous productivity loss.

XpreSSO to SAP was the answer to this challenge with no other vendor offering a similar solution in the market.

CUSTOMER REQUIREMENTS

The solution should perform Single Sign-on to multiple SAP systems via thick client SAP interfaces.

The solution should perform Single Sign-on to multiple web applications

XpreSSO to SAP MET THIS CUSTOMER'S REQUIREMENTS

XpreSSO to SAP helped the customer to greatly reduce the multiple logins. Users are only asked for credentials there workstation logins. Once logged in, the **XpreSSO to SAP** intelligently creates the session, allowing the user to access all the SAP systems and web applications seamlessly via a single web interface. Users are now only required to provide the password once. Frustration gone. User experience improved.
