

INSPIRING SOLUTIONS FOR ASSETS, PRODUCTION & ORDER PROCESSING

Scalable software, comprehensive service and superior customer support. FMIS is *the* Asset Management and Order Processing solution for all types and sizes of organisation, across the world.

THE SOLUTION

Modules designed to remove inefficiencies and data duplication, provide total control and be easy to implement and use:

FIXED ASSETS

Identify, locate, depreciate & control your assets according to the financial accounting & tax requirements of your organisation and country.

BARCODING

An efficient, accurate and flexible way to audit and track your assets.

EQUIPMENT & MAINTENANCE

Full life cycle management of all types of assets and equipment, including work orders, planned maintenance and physical tracking.

STOCK CONTROL

Control stock balances efficiently through auto replenishment, cycle counts and production demand.

LEASING

Efficient calculation of all leases and lease schedules, with the ability to handle complex mid-term adjustments, settlements and other events.

PURCHASE ORDER PROCESSING

Purchase to pay from requisitions to invoice matching including electronic authorisation and workflow design.

SALES ORDER PROCESSING

Quote to invoice including assembly/kitting, drop ship, work order management, electronic authorisation and workflow design.

PRODUCTION CONTROL

Demand management and auto-replenishment through purchasing or work order management with routing and workflow design.

CAPITAL PROJECTS

Commitment and spend controlled efficiently, visibly & flexibly.

FIELD SERVICE MANAGEMENT

Offline processing including the full suite plus time and expense management out in the field with streamlined synchronisation.

WELCOME TO FMIS

FMIS has over 25 years experience in the provision of quality software and support to an international client base. We provide world-class solutions ranging from our best of breed fixed asset register to full asset life cycle automation in addition to purchasing & sales order processing solutions. The flexible range of integrated modules ensures an exact and efficient fit to the most unique and complex set of business requirements.

EXPERIENCE COUNTS

Great software is only half the story. Our solutions are backed up by people with the experience and qualifications to understand the dynamics of asset management at every stage of the life cycle. FMIS has been leading the way in asset management since 1986 and has provided software and consultancy to some of the world's largest organisations.

Whilst having a wealth of experience we retain a youthful attitude of innovation and creativity which ensures a genuine enthusiasm for the task of identifying an organisation's business needs and providing a solution to match. In fact, there's nothing more certain to bring out the best in us than a problem that needs cracking.

FMIS is an intelligent solution

that offers all you need to control the capital planning, purchase, installation, usage, depreciation, maintenance and replacement of any type of asset and resource.

- **Simple** to use, modular software
- **Browser based**, easy to install and set up
- **Compatible** with the best known accounting and ERP systems
- **Powerful** to enable efficient processing of high volumes
- **Capable** of handling multi-company, multi-national depreciation, multi-currency, multi-lingual, multi-book requirements
- **Flexible** enough to adapt and reflect your organisation's structure, information requirements and processes
- **Unique** in its ability to keep up with leading edge functionality without large re-developments
- **Cost-effective** resource which improves the productive use of assets and return on capital
- **Coordinated** system that benefits your whole organisation; finance, purchasing, IT facilities and engineering
- **Streamlined** to remove paper and data duplication from your processes

A very efficient implementation, despite our complex requirements. FMIS listened to our needs and understood what would work for us. Internal and external audit requirements can now be satisfied and we have the essential information we had previously lacked for management decision making.

Danny Mansfield, Express Newspaper Group

STANDARD FEATURES

YOUR INDIVIDUAL NEEDS LISTENED TO

FMIS can provide anything from a stand-alone fixed asset register to a complete 'cradle to grave' asset management & tracking solution, to a fully integrated order processing and stock system.

DO YOU NEED:

- IFRS/SORP/SOX compliant fixed asset accounting, asset tracking and maintenance management, either in the public or private sector?
- Auditor approval?
- Improved internal control and procedures?
- Enhanced management information with excellent reporting and searching facilities?
- Forecasting facilities which are flexible yet simple to use?
- Maximum control over capital expenditure?
- Software which runs in a web browser, uses a Microsoft SQL Server database and is easy to install and use over widespread locations?
- Up to date, reliable barcode scanners?
- Barcode labels suited to your environment & printed to your requirements?
- Accurate recording of PAT testing, warranty tracking, fault logging and maintenance?
- Fully integrated modules which can be easily interfaced with existing systems, Excel etc?

Then you need FMIS.

FMIS has become the asset management solution of choice for hundreds of blue-chip companies in over 40 countries.

FMIS provided a quick robust comprehensive solution. It was able to deal with the complexities of our multi-site operations and also construction projects with varying go live dates. Demonstrations were with our own data which gave immediate reassurance.

Paul Gayle, **Eclectic Bars**
